

OUR BUSINESS IS GOOD CHEMISTRY

Environmental policy

Wibax is committed to reducing our environmental impact and shall conduct active environmental work which will be centered on our value Good Chemistry. We shall make informed decisions, strive for continuous improvement within our own operations as well as throughout the value chain when possible. We strive to lead in the transition to heavy electrified transport to contribute to a sustainable and low carbon society.

THIS POLICY MEANS THAT WE SHALL:

- Ⓢ As a minimum, meet all legal environmental requirements relevant to our operations, including ISCC.
- Ⓢ Set clear goals for reducing our greenhouse gas emissions and follow the complete climate impact of our business and products.
- Ⓢ Work to increase the proportion of renewable energy used and to improve our energy efficiency.
- Ⓢ Strive to produce our own renewable energy to fuel our electrical truck fleet.
- Ⓢ Cooperate with our stakeholders to improve our total environmental performance.
- Ⓢ Perform supplier due diligence to control the environmental impact of our supply chain.
- Ⓢ Actively work to reduce water usage and the amount of produced waste, based on operation intensity.
- Ⓢ Report risks, deviations and non-conformities, as well as suggestions of improvements.
- Ⓢ Establish well-known procedures for preventing and handling environmental risk and incidents.
- Ⓢ Handle and transport chemicals and waste with care for people and the environment.
- Ⓢ Drive vehicles with an environmentally and economically friendly approach.

Wibax management will regularly review and evaluate the policy. It is the responsibility of the Management that this policy is well understood by our employees and, where feasible, communicated to our customers and suppliers and other stakeholders.
